Dear Colleagues,

**Re: Myasthenic Screen by Indirect Immunofluorescence**

Following our recent change to the Myasthenic screen by indirect immunofluorescence I wanted to make our users aware that we are experiencing supply chain issues with the manufacturer. We are working closely with them to remedy this, and hope that the service will be able to resume in mid-January 2025.

We have safely stored your samples and will test these as soon as the new kits become available and have some stock to be able to perform urgent testing should it be required.

Please be patient and bear with us during this transition phase.

If you have any questions, please contact us on the above.

Yours faithfully

James Hoy  
Laboratory Manager - Laboratory Immunology
